Allowable Subject Matter

1. Claims 1-22 are allowed.

Independent claim 1 recites a method for automatically producing an optimal summary of a linear media source including “...optimizing the value of a segment fitness function over the similarity array in order to find an optimal segment, wherein the segment fitness function is adapted to measure the similarity between a segment of the parameterized media signal and the entire parameterized media signal and is a mathematical function of at least a location of the segment; and selecting a portion of the linear media source as the optimal summary, the portion of the linear media source corresponding to the optimal segment...” which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 2-22 are allowed for the reasons concerning the independent claims.

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andy S. Rao whose telephone number is (571)-272-7337. The examiner can normally be reached on Monday-Friday 8 hours.
